

China Southern Power Grid Energy Storage Container Company

Where is CSG's power grid located?

CSG's power grid covers the five provincial-level regions in southern China and is connected to the power grids of Hong Kong and Macao SARs, as well as Southeast Asian countries, with a power supply area of one million square kilometers, serving a population of 272 million.

What power sources does CSG use?

With the grid spanning nearly 2,000 kilometers from east to west, CSG is connected to various power sources, including hydro, coal, nuclear, gas, wind, solar, biomass, pumped storage, and new energy storage.

How much electricity does CSG make a year?

By the end of 2023, the accumulated international trade volume reached 70,712 GW h.

In 2023, CSG achieved electricity sales of 1,348,300 GW h, with an operating income of 842.6 billion yuan (\$116.7 billion).

It has been listed in the world's top 500 enterprises for 19 consecutive years, ranking 83rd globally.
