

Malaysia Super Electric Bus

When will electric buses be delivered in Malaysia?

The latest electric bus tender has closed and the appointment of contractors is expected soon. Delivery is targeted within 12 months of contract finalisation.

In the time being, Malaysia is deploying 310 new Euro 5 diesel buses under the 2025 Bus Replacement Programme.

How many electric buses are there in Kuala Lumpur?

Following their installation in Kuala Lumpur, where KL City Hall is located, the government is planning to increase the usage of entirely electric buses for public transportation.

Following that, further units will be added to the fleet beginning early next year, with a total of 60 electric buses being deployed by the end of the year.

Is Malaysia a market leader for electric buses in APAC?

Malaysia is the market leader for electric buses in APAC, and the market is expected to grow even more due to the presence of an established market for electric automobiles.

Furthermore, government initiatives such as zero-tariff import and excise duties on hybrid and electric vehicles would boost demand.

What is rapid bus Malaysia?

Rapid Bus Malaysia aims to drive the take-up of electric buses in the country with a target of having 30% of its bus fleet comprised of electric buses by 2030, growing to become fully electric (100%) by 2037, according to its display at the currently ongoing International Green Tech & Eco Products Exhibition and Conference Malaysia (IGEM 2023).

Why is Foton a leading brand of pure electric buses in Malaysia?

This not only represents the largest order of pure electric buses exported from China to Malaysia but also establishes FOTON as the leading brand of Malaysia's largest fleet of pure electric buses, injecting new vitality into Malaysia's green transportation initiatives.
